AP710 #1-8

Announcements:

The test for Monday covers all of equilibrium. You need to solve math problems, understand the lab, and answer questions about equilibrium in general. Work lots of problems and pay close attention to the College Board practice. The equilibrium test is the last test before the five week grading period so do a good job on it!

The next chapter is also about equilibrium as it pertains to acids and bases. Start your practice early! The next two labs do not go into your lab notebook.

Next Week:**Schedule:**

<i>Day</i>	<i>Date</i>	<i>Topic</i>	<i>Reading</i>
Monday	2/10	Strong/Weak Acid Lab	
Tuesday	2/11	Salts	
Wednesday	2/12	Salt Lab	
Thursday	2/13	Diprotic Acids	
Friday	2/14	Buffers	

Problem Sets:
