AP710 #1-8

**Announcements:**

The lab report for the Keq lab is due on Monday. We will also be having a test on Monday dealing with equilibrium. I have posted practice for both MC and FRQ. Study your butts off by working tons of practice problems and paying attention to your lab.

The whole key to the next few chapters is working tons of practice problems. Keep it up and focus on problems from the Zumdahl book if you need more practice. Also the Daily videos on the College Board web page are a good resource.
